STATE LICENSING BOARD FOR CONTRACTORS

APPROVED SOLAR ENERGY EQUIPMENT TRAINING PROVIDERS AND COURSES

Following is a list of Solar Energy Equipment Training Course Providers and their courses that have been approved by the Louisiana State Licensing Board for Contractors. In order for a contractor to add the specialty classification of Solar Energy Equipment to an existing Commercial License, the Contractor must complete a written request or an "adding a classification form" and pay all required fees associated with the additional classification.

Additionally, the Contractor must already have the classifications of either Building Construction, Electrical Work (Restricted/Statewide), Mechanical Work (Restricted/Statewide) or Electrical or Mechanical work as issued under the grandfathering clause of ACT 725. All contractors applying for the specialty of Solar Energy Equipment must have completed and provide proof to this Board of training in the design and installation of solar energy systems by an entity accredited by this Board.

If you are a training entity that would like to be accredited by this Board, please contact us at examinations@lslbc.louisiana.gov.
