## Trenchless Rehabilitation

### Classification Description:

Includes the inspection, maintenance, cleaning, repair, and rehabilitation of pipelines, manholes and other related appurtenances using pipe bursting, sliplining, cured-in-place pipe, deform/reform liners, pigging, pipe cleaning, gunite/shotcrete, chemical grouting, spray polymer and other coatings, other linings, spiral wound pipe, thermo-formed pipe, spun cast concrete, cast-in-place concrete, open cut dig-and-lay, open cut point repairs, and similar technologies. Also includes the excavation of pits and the use of excavation equipment to expose pipe, manholes, and related appurtenances to be rehabilitated.

Does **NOT** refer to the construction of new pipelines using Horizontal Directional Drilling, Road Boring, Jack and Bore (Dry, Wet, or Slurry), Microtunneling, Pipe Molding, or conventional trenching technologies.
